DATASHEET (Cybersecurity)

Meeting Security Standards with GoAnywhere MFT

Need to meet industry, state, or privacy laws and regulations in your organization? Ensuring your file transfers are 100% compliant is an important step in preventing data breaches, heavy fines, and public distrust—**and our secure file transfer solution, GoAnywhere MFT, can help.**

Here's how GoAnywhere MFT can help you manage and secure the exchange of private data in order to comply with a variety of compliance laws and regulations.

PCI DSS

The Payment Card Industry Data Security Standard (PCI DSS) is a regulation that increases controls over cardholder data (like credit and debit card information) to reduce the likelihood of fraud.

Key Features

GoAnywhere helps organizations achieve compliant file transfers with features like:

- Centralized controls and management
- Role-based administration and permissions
- Strong Key Management System (KMS)
- Detailed audit logs and reporting
- PCI Security Settings Audit Report

To learn more, visit: www.goanywhere.com/solutions/compliance/pci-dss

HIPAA & HITECH

The **Health Insurance Portability and Accountability Act** (HIPAA) is a regulation that sets the standard for protecting patient data, like protected health information (PHI).

The **Health Information Technology for Economic and Clinical Health Act** (HITECH) was passed to hold healthcare providers responsible for the adoption of electronic health records (EHR) and the adherence of data breach notification requirements.

Key Features

GoAnywhere helps organizations achieve compliant file transfers with features like:

- File transfer monitoring
- Detailed audit logs and reporting
- Granular user permissions
- Secure data exchange using SFTP, SCP, FTPS, and HTTPS

To learn more, visit: www.goanywhere.com/solutions/compliance/hipaa-hitech

GDPR

The **General Data Protection Regulation** (GDPR) is a new data protection regulation designed to harmonize data privacy laws throughout the European Union. It applies to organizations located within the EU or organizations that handle, process, or transfer the personal data of EU citizens.

Key Features

GoAnywhere helps organizations achieve compliant file transfers with features like:

- File transfer encryption technologies (e.g. OpenPGP, SSH, and TLS)
- Integrity checks for successful file transfers
- Detailed audit logs and reporting
- Secure Mail module for sending sensitive emails
- Admin User Roles for auditors and security or data protection officers

FISMA & NIST

The **Federal Information Security Management Act** (FISMA) is a set of security guidelines designed to reduce the security risk of data processed in the public sector.

The **National Institute of Standards and Technology** (NIST) is an agency that's responsible for developing FISMA security standards and guidelines. They list publications and best practices that government agencies must follow to be FISMA compliant.

Key Features

GoAnywhere helps organizations achieve compliant file transfers with features like:

- A FIPS 140-2 compliance mode for all file transfers
- Detailed audit logs and reporting
- Stringent security controls
- Granular user permissions

To learn more, visit:

www.goanywhere.com/solutions/compliance/fisma

Other Regulations and Laws

GoAnywhere MFT can also help organizations meet requirements for regulations and laws including:

- Family Educational Rights and Privacy Act (FERPA)
- The Dodd-Frank Act
- The Gramm-Leach-Bliley Act (GLBA)
- The Sarbanes-Oxley Act (SOX)
- Federal Trade Commission (FTC) & Federal Test Procedure (FTP)
- State Privacy Laws

Ensure File Transfer Compliance with GoAnywhere

We can help you meet compliance requirements for your file transfers! Request a demo for your specific data security needs, and we'll walk you through the product to see if it fits your organization.
